On behalf of the Ontario Photonics Industry Network and Canadian Photonics Consortium, we invite you to join us in Niagara Falls, Canada from June 1 - 3, 2010 for an exciting photonics event: the Photonics North Conference and Exhibitor Product Showcase. The conference and showcase will be held at the Fallsview Casino Resort, which is located just beside the falls and close to a number of cultural attractions as well as many hotels and restaurants.

A major theme of this year's event will be Solar Photovoltaics. We are pleased that the first [Canadian Conference on Photovoltaics](#) will be part of Photonics North 2010.

2010 is the 50th anniversary of the invention of the laser and we plan a number of events to celebrate this historic milestone. Together they present a unique opportunity to visit a beautiful city, participate in an outstanding international event and meet with leading researchers and representatives from numerous innovative photonics companies.

We look forward to meeting you in Niagara Falls,

Michael Scott

Co-chair of Photonics North 2010

Executive Director, Canadian Photonics Consortium
